

Association Activity

- Place all the cards face up in the middle of the table.
- Pick any card to start.
- Place that card in front of you on the table.
- For example: **school**.
- The next player chooses one card that he/she associates with the word **school**.
- For example: **board**. The student then starts the story... The children are in **school** and the teacher is writing on the **board**.
- The next player chooses one card that he/she associates with the word **board**.
- For example: **game**.
- After the teacher writes the rules of the game on the **board** she lets the students play the **game**.
- The activity carries on until all the cards have been used.
- Any player putting a card down places it next to the card he/she associates the word to. Each card has 4 sides so that a student can always go back to a card that has already been used and use a different side.
- For example: After using the word **school** and **board** the next player can use the word **school** again and say. After the teacher writes the homework on the **board** the children leave **school** and wait for the school **bus**.
- Leave it up to the students. Each time this activity is played you will receive a completely different story, the imagination runs wild!!! Enjoy ☺
