How to play the AUTUMN BOARD GAME.

You will need 2 red counters, 2 green counters and 1 die.

Each student places his/her 2 counters on the coloured circles.

The first student rolls the die and moves along the board. That student names the picture he/she lands on.

It is the next students turn.

Both students need to move their counters round the board until both counters are HOME.

2 rules:

1. If a student lands on a square where the other student has a counter, he knocks the other student's counter off the board. The other student has to start from the beginning again.
2. When the students reach their HOME they have to roll an exact number to move their counter HOME.
